Fribourg profile

In line with the Department's philosophy, you will be allowed to write your thesis on a rich variety of topics within the general framework of education sciences. Our Professors will guide you in defining the most relevant questions referring to education and training in various contexts such as school, –from Kindergarten to High-school or University–, families, culture or workplace.

Depending on the topics you'll work on, your dissertation will have a stronger empirical focus or a more theoretical, fundamental accent. In any case however, you'll be asked to ground your work in a strong theoretical perspective, and to conduct a thorough literature review on the subject.

Doctoral students in education at the University of Fribourg are given the possibility to attend various doctoral programmes, offered by our Department in conjunction with partner Universities in Switzerland, Bern, Geneva, Lausanne, Neuchâtel or Zurich.

Before registering, you'll have to contact a Professor in the list below and discuss your intentions and interests with him or her. Although most of them do accept dissertations to be written in English, not all of them do so. In some cases, you might be asked to compose your thesis in French or in German, the two official languages of the University.

Professors who are eligible to supervise theses

• Prof. Jean-Louis Berger

Areas of specialisation:

- Self-regulated learning
- Motivation to learn and to teach
- Metacognition
- Vocational Education and Training

– Assessment

Admission

In order to be admitted to a doctorate the candidate must have been awarded an academic **bachelor's and master's degree** or an equivalent qualification from a university recognised by the University of Fribourg.

Before applying for a doctorate the candidate must contact a **professor** who would be willing to supervise the thesis work.

There is **no general right** to be admitted to a doctorate.

The respective conditions of admission for each doctoral study programme are reserved.
